
Remembrance Package

Every life has a story. We can now help you tell that story in a touching way.

In addition to our personalized funeral arrangements, we now offer a lasting tribute through the creation of an electronic Remembrance Presentation. Filled with photos, stories and captions, elements each is graphically assembled into a moving presentation which will be displayed and viewed on-site by a computer screen at visitation or the memorial/funeral service.

You can celebrate the life of your loved one through a particular graphic theme associating their life's ambition, work or cause. Our **basic** Remembrance Presentation includes a scrolling collection of 12 memorable photos and text captions. Remembrance Presentations may also be customized to include music, video, condolences, or stories either in text or a voice narrative. Also, share the legacy of a life well lived by providing friends and family with additional CD copies of the Remembrance Presentation for future generations, or let us convert your presentation into a Flash file for posting to the web for viewing by friends and family around the world that could not attend the funeral services.
